

DENTAL LIGHT

AXIS ELITE / ATOM PLUS

ADVANCED COMFORT AND VISUALIZATION:

Enova developed the **Axis™ Elite LED Light** to be a lightweight, ergonomic illumination solution compatible with all Enova loupes.

The Axis Elite is one of the lightest dental lights on the market and the pivot connection allows for personalized alignment with field of view. The light can be paired with the Activ Elite neck battery or PP1.5 Elite hip battery to provide variable light intensity, and maximize magnification.

When used in conjunction with Enova's lightweight Vizix® loupes, clinicians benefit from superior illumination, visualization, and comfort, allowing them to perform with ease and confidence.

A TETHER-FREE LIGHT SOLUTION:

Experience the freedom of a wireless, tangle-free work environment with the **Atom Plus Wireless LED Light**. This lightweight, versatile solution provides a bright, white spotlight.

With a magnetic loupe adapter, it quickly and easily fits your existing loupes or most major brands with the perfect accessory. The reliable magnet attachment will provide all-day hold. The Atom Plus wireless light is ideal for professionals who need a powerful lighting option for clinical or minor surgical procedures.

The package comes with two rechargeable batteries, a charger, detachable filter, and screwdriver- all packed in a carrying case.
